SUBMISSION OF ENGLISH TRANSLATION OF
INTERNATIONAL PRELIMINARY EXAMINATION REPORT

Dear Sir:

Enclosed please find an English translation of the International Preliminary Examination Report concerning the above-identified application. Please enter the same into the record of this case.

In the event that there are any fee deficiencies or additional fees are payable, please charge the same or credit any overpayment to our Deposit Account (Account No. 04-0213).

Respectfully submitted,

Michael J. Bujold, Reg. No. 32,018

Date of mailing (day/month/year) 03 August 2006 (03.08.2006)	
Applicant's or agent's file reference TOY-1-PCT	IMPORTANT NOTIFICATION
International application No. PCT/JP2004/016273	International filing date (day/month/year) 02 November 2004 (02.11.2004)
Applicant TOYOOKI KOGYO CO., LTD. et al	

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter I).

The International Bureau transmits herewith a copy of the English translation of the international preliminary report on patentability (Chapter II).

2. Transmittal of the copy of the translation to the designated or elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following designated or elected Offices requiring such translation:

None

The following designated or elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, KE, KG, KP, KR, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability (Chapter II).

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned within the applicable time limit (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCI/JP2004/016273

Box No. I	Basis of this opinion
1.	<p>With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.</p> <p><input type="checkbox"/> This opinion has been established on the basis of a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).</p>
2.	<p>With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:</p> <p>a. type of material</p> <p><input type="checkbox"/> a sequence listing</p> <p><input type="checkbox"/> table(s) related to the sequence listing</p> <p>b. format of material</p> <p><input type="checkbox"/> in written format</p> <p><input type="checkbox"/> in computer readable form</p> <p>c. time of filing/furnishing</p> <p><input type="checkbox"/> contained in the international application as filed.</p> <p><input type="checkbox"/> filed together with the international application in computer readable form.</p> <p><input type="checkbox"/> furnished subsequently to this Authority for the purposes of search.</p>
3.	<p><input type="checkbox"/> In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.</p>
4.	<p>Additional comments:</p>

Form PCT/ISA/237 (Box No. I) (January 2004)

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/JP2004/016273

Box No. IV

Lack of unity of invention

1. ☐ In response to the invitation (Form PCT/ISA/210) to pay additional fees the applicant has:
- ☐ paid additional fees
 - ☐ paid additional fees under protest
 - ☐ not paid additional fees
2. ☒ This Authority found that the requirement of unity of invention is not complied with and charge not to invite the applicant to pay additional fees.
3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is
- ☐ complied with
 - ☒ not complied with for the following reasons:

A common technical feature of claims 1, 3, 4, and 5, which are independent claims of the present application is in an electromagnetic valve device "disposed in a gas tank filled with a high-pressure gas, having a movable magnetic core attracted to a fixed magnetic core and released therefrom by passing an electric current to a coil and terminating the passage of the current, wherein a valve body executes opening and closing action by coming into contact with a valve seat and being separated therefrom, wherein a valve main body having formed therein a fluid channel for communicating the inside of the gas tank with the outside is inserted from the outside into the inside of an orifice of the gas tank and installed in the orifice, a valve seat is provided in the fluid channel, a valve body that is free to move so as to come into contact with the valve seat and separate therefrom is provided in the valve main body, and an electromagnetic section comprising a movable magnetic core that is engaged with the valve body and can move and a fixed magnetic core that is provided opposite the movable magnetic core, attracts the movable magnetic core when an electric current is passed to the coils, and stops attracting the movable magnetic core when the supply of electric current to the coil is terminated is disposed inside an accommodation hole formed in the end section of the valve main body on the inner side of the gas tank." Because this structure is described in JP 2003-240148 A, no common special feature exists among the independent claims. Furthermore, claims 1 and 3, 4, or 5 do not have a common problem.

4. Consequently, this opinion has been established in respect of the following parts of the international application:
- ☒ all parts
 - ☐ the parts relating to claims Nos. _____

Form PCT/ISA/237 (Box No. IV) (January 2004)

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY		International application No. PCT/JP2004/016273
Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement		
Novelty (N)	Claims 1-7	YES
	Claims	NO
Inventive step (IS)	Claims 4-5	YES
	Claims 1-3, 6-7	NO
Industrial applicability (IA)	Claims 1-7	YES
	Claims	NO
2. Citations and explanations		
Claims 1-2.		
Document 1: JP 2003-240148 A (Aisan Industries Co., Ltd.) Document 2: WP 96/35052 A1 (Robert Bosch GmbH)		
Document 1 describes an electromagnetic valve mounted inside a tank. Document 2 describes that an opening is formed in an end surface of a casing portion 4, which is equivalent to a cap member of the present application, in an electromagnetic valve, a filter member is disposed in the opening, and a fluid channel connecting an inflow pipe piece and an outflow pipe piece is provided along an outer side of the magnet casing. Employing a channel and valve casing structure described in document 2 as the fluid channel and valve casing structure of the electromagnetic valve described in document 1 would be easy for a person skilled in the art.		
Claim 3		
Document 1 and Document 3: JP 8-270820 A (CKD Kabushiki Kaisha)		
Document 3 describes forming an opening communicating with a fluid channel on the outer peripheral side of a valve main body and disposing a filter member in the form of a ring in the opening. Disposing a filter member in the form of a ring described in document 3 in the inlet port 19 of the electromagnetic valve described in document 1 would be easy for a person skilled in the art.		

Form PCT/ISA/237 (Box No. V) (January 2004)

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/JP2004/016273

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claim 2 describes "a fluid channel ... said valve main body on the outer side of said accommodation hole", but the "accommodation hole" has not been described heretofore and the configuration is, therefore, not clear.

Claim 5 describes that "a discharge channel capable of discharging said high-pressure gas to the outside is provided independently of said fluid channel in the valve main body, and a lead wire connected to said coil and outer power source is inserted through said discharge channel", but neither the specification nor the drawings describe a technology for closing the discharge channel having a lead wire inserted therethrough or a technology for removing the lead wire from the tube, and those features are not described to the degree sufficient for a person skilled in the art to implement the present invention.

PCT/JP2004/016273

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation of Box V

Claims 6-7

Documents 1-3

A technology of applying pressure to a member to be fixed with an elastic member inserted into a hole and locking the movement with a locking ring is a technology that has been widely employed for fixing an object inside a hole in the field of mechanics.

Furthermore, employing this technology for fixing a coil and/or a fixed magnetic core would be easy for a person skilled in the art.

Claim 4-5

Documents 1-3

The documents cited in the ISR neither describe nor suggest inserting a member for positioning in the rotation direction into a groove formed in a valve main body and a groove formed in a fixed magnetic core and forming a notch for passing through a lead wire connected to a coil and an outer power source in the member for positioning in the rotation direction. Furthermore, the documents neither describe nor suggest forming a discharge channel capable of discharging a high-pressure gas to the outside separately from a fluid channel in the valve main body and passing a lead wire connected to a coil and an outer power source into the discharge channel.
